

## New Explosion Proof LED Light Towers from Patlite Certified for Use in Class I, Division 1 and Division 2 Application Environments

Patlite introduces two FM-certified LED light towers for use in Class I, Division 1 and Division 2, Exd IIC T6 explosive application environments. The five-light EDWM-style model is based on the company's popular [WME-A tower](#), and is available for AC/DC24V or AC90-250V operation. The three-light EDLM-style model is based on the company's [LME tower](#), and is available for AC/DC24V or AC120V operation.

The light towers can help improve safety and productivity by providing reliable at-a-glance visual status indication in challenging explosive environments; in addition to being FM tested and certified, featuring Class I, Zone 1, Ex d IIC T6 explosion protection ratings, with an IP-66 rating to making them an ideal solution in wet or dirty locations.

The color modules are highly resistant to vibration which greatly reduces maintenance costs, and uses bright LED technology that lasts over 40,000 hours of continuous operation. Each LED module can be wired through an easily accessible terminal block for continuous-on or flashing mode, and two angle brackets facilitate top and wall-mount orientations, to satisfy the unique needs of each application. Each also features a 3/4 in. NPT wire exit port, making it easy for a 3/4" conduit pipe to be connected to the unit.

### **ABOUT PATLITE**

Founded in 1947, PATLITE is a leading provider of innovative LED status indicating lights, sound alarms, visual and audible communication network systems and solutions which enhance the safety, security and comfort of workplaces and communities.
