

Food Safety

Lock-out unauthorized personnel!

Visualize with an easy system

Implementation Merit

Before Implementing

The Inability to immediately distinguish between authorized and unauthorized personnel.

Even with a camera installed, immediate notification may not be possible.

After Implementing

Using a face authentication system in conjunction with the network monitor Signal Tower will immediately trigger an alarm when an unauthorized operator attempts to enter a secure area.

Configuration/Application

Configuration

[Network Camera]

[Patlite]
NH Series

Application

Face-authentication-linked System

Face authentication systems can be integrated with the network monitor Signal Tower as a surveillance system to announce an event in a timely manner.
