SPECIFICATIONS

Product Name
Wireless Data Acquisition System
WD PRO Base Unit Input/Serial Communication Unit

/WD PRO Transmitter

Model:WDB-D80S-PRO/WDT-6LR-Z2-PRO

PATLITE Corporation

Drawing No.	Rev.	Page
WDB-D80S-PRO-W18	G	2/12

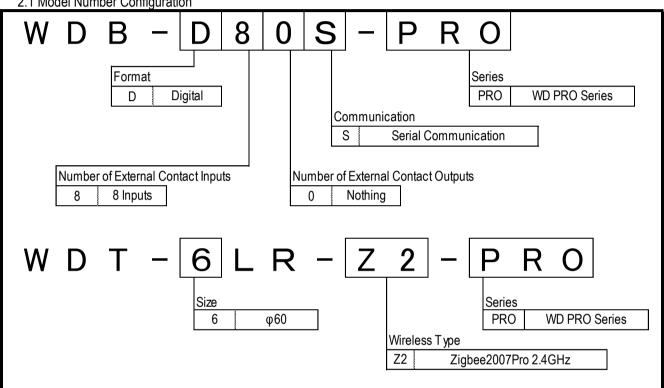

1. Product Overview

This product transmits not only signal tower information but also external input information and serial communication information to the host by wireless communication.

This document describes the general specifications of WD PRO Base Unit Input/Serial Communication Unit / WD PRO Transmitter, and functional specifications combining them.

2. Model

2.1 Model Number Configuration

2.2 Model Number List

WDB-D80S-PRO WDT-6LR-Z2-PRO

XPlease be sure to use the above models in combination.

3.2 WD PRO Transmitter

0.2 VID I NO Transmitter	
Model	WDT-6LR-Z2-PRO
Operating Ambient Temperat	
Operating Ambient Humidit	
Storage Ambient Temperatu	re -20°C to +60°C
Storage Ambient Humidity	85%RH or less (No Condensation)
Mounting Location	Indoor Only
Mounting Direction	Upright
Protection Rating	IP65 (IEC 60529) / NEMA TYPE 4X,13
Environmental Condit	on Upright
Insulation Resistance	More than 5MΩ at 500VDC between live part and non-current carrying metallic part
Withstand Voltage	500VAC applied for 1min between live part and non-current carrying metallic part
Mass(Tolerance: ±10%)	90g
Outer Dimensions	Refer to the Outer Dimension Drawing
WirelessCommunication	-
Wireless Standard	IEEE 802.15.4 compliant
Communication Frequence	y 2405 to 2480 MHz (16 channels)
Transmission/Receiving Me	hod Direct Sequence (DS-SS) Format
Communication Method	Zigbee2007 compliant, with ZigbeePro Stack
Transmission Output	Maximum 3 m or less (at the antenna feed)
Communication Distance	Line of sight, approximately 30 m (reference value)
Display Unit	Indicator for status display
Operation Unit	None
	Japan Radio Law (ARIB STD-T66 Conformity) *2
	UL 508 ,CAN/CSA C22.2 No.14-18
	FCC Part 15 Subpart B Class B, Subpart C *2
Conformity Standards	EN 55032 Class B, EN 55035, EN 62368-1
Comornity Standards	EN 300328, EN 301489-1/-17, EN 62479, EN 50663, EN IEC 63000
	KN 301 489-1/-17,NCC*2
	NBTC announcement on telecommunication equipment that has exempted for certificate date 18 December 2017
	NOM-208-SCFI-2016, IFT-008-2015
Supported Countries and Regions	¾1 Japan, United States, Europe, China, Korea, Taiwan, Thailand, Mexico
	- Conforms to the CE Requirements
References	- Conforms to the UKCA Requirements
	-UL/cUL Recognized Component (File No.E215660)

^{*1} Do not use outside of supported countries and regions.

You could be violating laws and regulations when using in countries outside of supported countries and regions.

3.3 Supported Unit

LED Unit	LR6-E-□,LR6-E-□Z,LR6-E-MZ *Maximum number of 5 tiers for LED Units
Buzzer Unit	LR6-BW

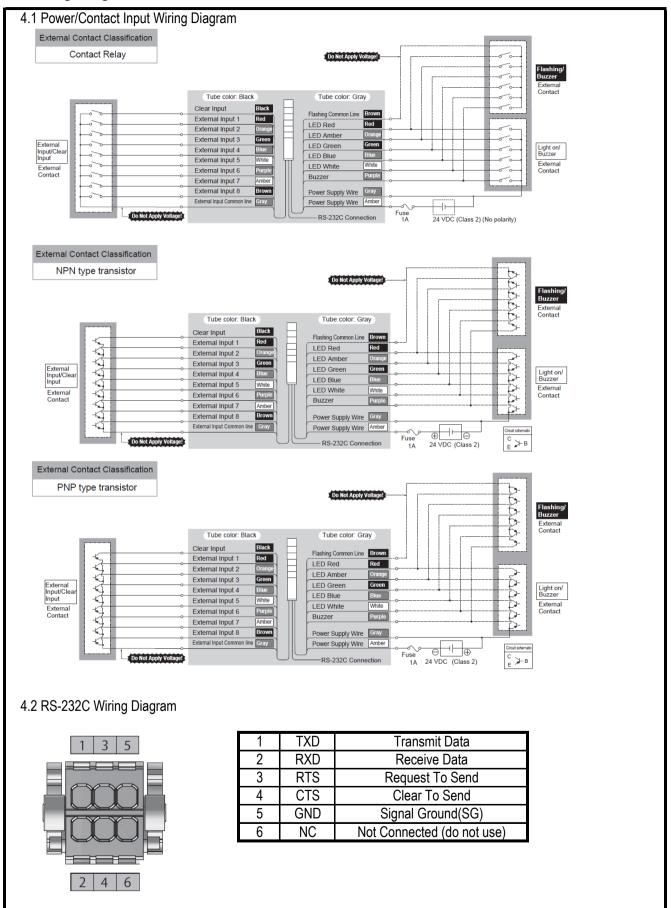

3.4 Supported Option

Serial Cable	WDX-SC01
Wallmount Bracket	SZK-003W, SZK-001U
Pole Bracket	SZP-004W
Pole	POLE-□00A21
Mounting Pole Base	SZ-016A, SZ-010
Mounting Bracket	SZW-002W

^{*2} Built-in certified wireless module

5. Function Specification

5.1 Glossary

Term	Description
WDB-D80S	WD PRO Base Unit Input/Serial Communication Unit on the WD wireless network.
	Model: WDB-D80S-PRO
WDT-PRO	WD PRO transmitter on a WD wireless network.
WDT-FIXO	Model: WDT-6LR-Z2-PRO
WDT	Transmitter on a WD wireless network.
VVDI	Models: WDT-5E-Z2, WDT-6M-Z2, WDT-4LR-Z2, WDT-5LR-Z2, WDT-6LR-Z2, WDT-6LR-Z2-PRO
WDT-LR	Transmitter on a WD wireless network.
WDI-LN	Models: WDT-4LR-Z2, WDT-5LR-Z2, WDT-6LR-Z2
WDR	Receiver on a WD wireless network.
אטא	Model: WDR-L-Z2 WDR-LE-Z2,WDR-L-Z2-PRO(-L),WDR-LE-Z2-PRO(-L)
WD PRO Base Unit	Base Unit used in combination with WDT-6LR-Z2-PRO
VVD FNO base offic	(In this document WDB-D80S-PRO is shown.)
Host	Equipment for operation of the WD system.

5.2 Function Overview

Term	Description	Reference
Signal Tower Control Functions	Runs control of LED and buzzer units. There are two types: Control based on the Signal Tower control line, and remote control from the host.	5.3.1
Contact Input Line Functions	Determining the signal input status of the Signal Tower control line. Saving the accumulated value (counter value) of pulse inputs (incremented 1 at a time) on a signal wire. Detect changes in state of 8 external input lines and to save that information. Detect inputs on the clear input line and to save that information.	5.3.2
RS-232C Communication Functions	Runs communication with external equipment, such as a bar code reader, through the RS-232C interface.	5.3.3
Wireless Data Communication Functions	Wirelessly transmits to WDR the status information of data input. Receives RS-232C data from the host and transmits to external equipment.	5.3.4

Drawing No.	Rev.	Page
WDB-D80S-PRO-W18	G	7/12

5.3 Function Details

5.3.1 LED Unit and Buzzer Unit Control Functions

Term	Description			
	Functions that control LED or buzzer units with the Signal Tower control line.			
Signal Tower	LED unit control	Individually controlled for each color.		
Control Functions		Light on/Flashing (control with flashing common line) / Light off		
	Buzzer unit control	trol Buzzer on/Continuous(control with flashing common line) /Buzzer off		
	Functions that use	es specific commands from the host to perform remote control of LED or		
	buzzer units.			
	These Functions	operate with a higher priority than Signal Tower Control Functions.		
Remote Control	LED unit control	Individually controlled for each color.		
Functions	LED UNIT CONTROL	Light on/Flashing/Light off/Triple flash/control from Signal Tower control line		
		trol Buzzer on/Continuous/Buzzer off/control from Signal Tower control line		
		, , ,		
	Response	includes the status of the LED unit or buzzer unit that is under remote control.		
	Function that enables operation transition from "Remote Control Function" to "Signal Tower			
	Control Function"			
		Set the clear input line from OFF to ON.		
Release Remote	How to Release	When the command is started (refer to "Remote Control Functions") specify		
Control Function		the enable control time. Remote control is released after the enable control		
Control i unction		time elapses from when control started.		
		Remote control is released after a specific command is received from the host.		
	Release Control	The remote control function is released, and a release control notification is		
	Notification	transmitted to the host.		

5.3.2 Contact Input Line Functions

Term	Description				
	Function that determine the signal input status of the Signal Tower control line.				
Determine Signal Tower	Determination	Lighting: Light on / Light off / Flashing			
Control Input Function		Buzzer : Buzzer on ∕ Buzzer off			
	Setting	Normal / Flashing(short) / Flashing(medium) / Flashing(long)			
Function to Determine	When multiple ch	anges in Signal Tower control lines and external input lines occur at the			
Simultaneous Input	same time, use th	nis function to adjust the period for determining simultaneous input.			
Simultaneous input	Setting	High sensitivity ✓ Medium sensitivity ✓ Low sensitivity			
	Count up the num	ober of pulse inputs (increment 1 at a time) on a single Signal Tower control			
	line and store the accumulated value (counter value).				
	When the power is shut down, the counter value is cleared to 0.				
	Count Up	The determine count up operation occurs when the input line changes from			
		OFF to ON.			
Simple Counter Function		When counting up exceeds the upper limit, the counter value returns to 1.			
Simple Counter Function	Pulse Input	OFF: 100ms or longer, ON: 100ms or longer			
	Condition	·			
	Upper Limit Value				
	Initial Value	"0"			
	How to	From the host, write "0" with the command to change the count value.			
	Initialize Value	•			
Determine External	On detecting a ch	ange in state in one of the 8 external input lines, this function determines the			
Input Line Function	input status.				
Determine Clear	On detecting a ch	nange in state in the clear input line, this function determines the input status.			
Input Line Function	on

5.3.3 RS-232C Communication Functions

5.3.3 RS-232C Communi	Cal	IOH FUNCTIONS				
Term	Description					
	Function for transmitting and receiving data between external equipment and the RS-232C interface.					
			Baud rate: 4800/9600/19200/38400/57600/115200 bps			
		Communication	Data Length : 7 bits/8 bits			
		Setup	Parity : None/Even/Odd			
			Stop Bit : 1 bit/2 bits			
			Following the data	file format settings, this product receives data via RS-232C		
			communication. Yo	u can select supported file formats from 3 types.		
			Receiving	Maximum data size is 60 bytes. (Only the first 60 bytes are		
			Data Size	received when the data size exceeds 60 bytes.)		
	Receive Data File Format	Direct	Data received from RS-232C devices is transmitted			
RS-232C		Communication	directly to WDR.			
Communication		Format	Lancony to WDIV.			
Functions		Bar Code Reader	Exclusive receive format for Denso Wave [models AT20B-			
		(Denso Wave)	SM(R) and AT21BSM(R)]. With this format, the header			
		Communication	code, terminator code, and BCC are deleted from the			
		Format	received data and transmitted to WDR.			
		Bar Code Reader				
		(generic)	With this format, the header code and terminator			
		Communication	code are deleted from the received data and			
			Format	transmitted to WDR.		
			This product trans	mits to external equipment data received from the host.		
	Data Transmission		Transmission	Maximum data size is 40 bytes. (Transmitting data		
			Data Size	sizes greater than that will return an error.)		

5.3.4 Wireless Data Communication Functions

Term	Description			
	Function for wirelessly transmitting to WDR the status information of each contact input line or the RS-232C data			
	Timing of Input Information	On change	Directly transmit the change in status on each contact input line or the information input over RS-232C.	
	Transmissions	Response	Transmit information as a response to a request from the host.	
	Periodic	Automatically transmit information at defined intervals.		
	Transmissions	Setting	None/Unit Information/Input Information - Signal Tower Information	
			al Tower Control Line : 6 contacts	
Information Transmission	Input information transmitted	Status of External Input Line: 8 contacts		
Function		RS-232C Communication Data : Maximum 60 bytes		
		Counter value of Signal Tower control line inputs		
	Format of input information transmitted	WDT-PRO Format	In a single operation this command can get the Signal Tower control line, external input line,and counter value of Signal Tower control line inputs. This command can also get RS-232C communication data information.	
		WDT-LR Format	From the input information transmission contents, this command can get 1 of the sets of information.(WDT-LR compatible format)	
Retentive Status Function	Retentive Status Function is for temporarily saving transmission information in this product. Temporarily			
	saved information is transmitted to WDR, in order, from oldest to newest.			
Receive Information	Function for the WDT-PRO to wirelessly receive from the host remote control commands for the LED			
Function	and buzzer unit, or data to transmit to connected external equipment.

[Handling Precaution]

◆About handling this product

- This product (including software) is shipped only after undergoing strict quality controls and inspections. However, should you encounter any issues, please contact your PATLITE sales representative.
- •This product (including software) is developed, designed and manufactured for general usage, such as office use, personal use, standard industry, and other related systems. Do not use, either directly or indirectly, in applications where a high level of safety is required, such as where human life is involved. We shall not be held liable for any damages or losses, nor be held responsible for any claims by a third party, as a result of using this product.
- The suitability of this product in the system, with other machines and equipment, shall be tested and confirmed by the customer. We assume no responsibility regarding this. Design safety into the system to cope with misoperation, misuse, going offline, and other unforeseen operation of this product.
- •We bear no responsibility for damages, lost opportunities, lost profits, compensation for accidents, or other costs including but not limited to personnel, construction, transportation, and shipping costs, related to using this product. We bear no responsibility for defects in other products, regardless of the other product's connection to this product (such as a communication line), or for the cost of repairing damages, losses, defects, or recovering lost data related to using the other products, including but not limited to personnel, construction, transportation, and shipping costs.
- •To improve the functionality in the software for this product, we will update the software at our own discretion. We bear no responsibility for the results of software updates, such as damages, lost opportunities, lost profits, compensation for accidents, or other costs including but not limited to personnel, construction, transportation, and shipping costs, related to using this product. We bear no responsibility for defects in other products, regardless of the other product's connection to this product (such as a communication line), or for the cost of repairing damages, losses, defects, or recovering lost data related to using other products, including but not limited to personnel, construction, transportation, and shipping costs.
- Note the following statements regarding the software for this product, which require prior written consent from PATLITE:
- * Do not duplicate the software for this product.
- * Do not alter, combine, reverse-engineer, decompile, or disassemble the software for this product.
- * Do not license, rent, or resell the software for this product to a third party.
- * Do not store the software of this product on a network so it can be transmitted to a third party.
- * Do not remove the copyright notice or other trademark and company rights attached to the software for this product.

◆Things you should always do for your safety

- Avoid spilling liquids (such as water or chemicals) into this product. Avoid dropping foreign metallic objects (such as copper wire) into this product.
 Failure to follow these instructions could result in electric shock or equipment damage.
- Do not drop or hit this product. Failure to follow these instructions could result in electric shock or equipment damage.
- Do not apply too much force to switches and buttons on this product. Failure to follow this instruction could result in equipment damage.

◆Installation

- Turn off the power when wiring, inspecting, or repairing this product. Failure to follow this instruction could result in equipment damage.
- Do not install in locations near fire, or environments with high temperature and humidity. Do not install this product where corrosive or flammable gas is present.
- Do not install on an unstable surface. Failure to follow these instructions could result in injury or equipment damage.
- This product is rated for indoor use only. Please install and use this product indoors only.
- Avoid the following locations for installation of this product.
- * Places exposed to direct sunlight.
- * Places near fire or environments with high temperatures and humidity.
- * Environments where temperature changes are severe, and where there is condensation.
- * Environments with poor breathability and ventilation.
- * Places where external vibrations are directly transmitted to this product.
- * Environments where corrosive gas is present.
- * Locations exposed to salty sea air.
- * Locations near strong magnetic fields.
- * Environments where there is dust, iron powder, and so on.
- $\boldsymbol{\ast}$ Environments where chemicals and oil mist are present.

◆About maintenance

- Do not clean this product with volatile chemicals such as benzine or thinners, or with chemical wiping cloths as it could damage the product.
- Please clean this product with a soft, dry cloth.
- If the dry cloth is unable to clean off any dirt and grime, wipe the product firmly with a slightly water-moistened cloth.
